## Polymer Systems Brochure

PHOENIX Process Equipment Co. shows its auto/CHEM™ Polymer Systems in a new brochure.

The PHOENIX Model D auto/CHEM™ Dry Polymer System meters and mixes dry chemicals with water and delivers the slurry to thickening and/or dewatering equipment. Compact, skid-mounted packages including dry polymer storage, wetting hopper, pumps, piping train, and controls simplify installation and start-up. Automatic (PLC) controls are available for maximum operational flexibility.

PHOENIX Model E auto/CHEM™ Emulsion Polymer Systems include pre-piped water supply components; a skid-mounted neat polymer pump with valves and piping; the solution mix tank/mixing unit, a solution floc delivery pump with the required valves & accessories; and system controls.

PHOENIX Process Equipment Co. is a leading global supplier of systems for separation, classification, thickening and dewatering dredged sediments, coal tailings, and other minerals slurries and for dewatering sludge from wastewater treatment systems.
